V3.2.2.6.2R5	Notice:
2023/12/14	This firmware must be upgraded from V3.2.2.4.0 or later. If your analyzer has an earlier version,
	please update to V3.2.2.4.0 first and then proceed to update to the latest version.
	New Functionality:
	Add Picture Viewer
	Add Open Source Acknowledge
	• Add Remote Control Mode, when entering, the interface displays system time, limit status,
	system messages, etc., shielding UI refresh. SCPI: DISPlay:WINDow:ENABle ON OFF
	Save the configuration every 60 seconds, and load it when Power On is turned Last
	• SA mode Limit Setup adds Fail to Save, which automatically saves screenshot and trace data
	when the Limit Test result is Fail. It can only be used when Fail to Stop is turned ON
	 Improvements: Preset optimization: When pressing the Preset button, it will first jump to the Preset menu
	instead of directly performing Preset; Touch Assist's Preset adds preset option
	Optimization System Info display content
	 When taking screenshots, do not capture the message indicating successful screenshot
	Limit the length of numbers entered on the screen and keypad
	 Add SCPI commands to read system messages:SYSTem:MESSage?
	Added screenshot function under the Help window
	Set the FFT menu to invalid when the SA mode cannot select FFT
	SA mode can open the Freq Counter for markers other than marker 1
	The SA mode peak table displays the peak of the current trace
	• The SA mode peak table displays the peak of the current trace, rather than the current
	marker's trace
	The dBc parameter range of the SA mode OBW is changed to negative numbers
	When Noise Marker is turned on in SA mode, set Detect Type to Average
	• In SA/MA/EMI mode, Wait for Trigger is displayed only if Trigger is not triggered for 2 seconds.
	When using markers in SA/MA/EMI modes, display the marker info enlarged in the upper left
	corner of the screen
	SA/EMI mode display more information of limit fail and pass
	The MA mode supports the SCPI command: TRACe#[:DATA]? to get trace data
	 SCPI command for setting marker X in MA mode: TRACe#:MARKer#:X supports specifying time units
	time units
	Solved Issues:
	 Fix the problem of the inconsistency between the numerical accuracy displayed in SA mode
	Freq menu Ref Offset and the status bar on the left
	 Fix the problem of Marker display unit error when Noise Marker is turned on in SA mode
	• Fix the problem of the SCPI command TRACe#:MODE in the SA mode setting trace type,
