

2000 Series Oscilloscope Power Up Promotion

SIGLENT Power Up Promotion

Free Bandwidth Upgrade! SDS2000X PLUS Oscilloscope Promotion

Value \$1199

200 MHz, 350 MHz, 500 MHz

100 MHz, 200 MHz, 350 MHz

SDS2000X PLUS Free Bandwidth Upgrade

Offer expires: 10/31/2023

SIGLENT SDS2000X Plus Bandwidth Upgrade Promotion

Characterizing signals and systems from R&D to failure analysis is more important than ever. Testing higher speed communication channels and verifying power designs ensures that the products going to market meet the growing demands of customers and regulatory requirements.

Future proof your lab oscilloscopes with free bandwidth upgrades or high-resolution power analysis capabilities. The SDS2000X Plus oscilloscopes are a great choice for lab and bench testing of high-speed signals. Analyze tomorrow's signals today with a free upgrade to the next bandwidth level.

Purchase any SDS2000X PLUS model from 5/1/2023 through 10/31/2023 and get a free bandwidth upgrade. To learn more about the feature-rich SDS2000X Plus, click here: <https://www.siglentna.com/digital-oscilloscopes/sds2000xp/>

Products	Models	Free Bandwidth Upgrade (software)	
SDS2000X PLUS	SDS2104X Plus	Upgrade to 200MHZ	a \$1199 value
	SDS2204X Plus	Upgrade to 350MHZ	a \$1199 value
	SDS2354X Plus	Upgrade to 500MHZ	a \$1199 value

(Offer expires: 10/31/2023)

The banner features the SIGLENT logo on the left and the text "Power Up Promotion" in orange on the right. Below the logo is the text "Power Your Test! SDS2000X HD Oscilloscope Power Up Promotion". The central image shows a SIGLENT SDS2000X HD oscilloscope on the left and a blue box representing the "Power Analysis Option" on the right. The box contains a smaller oscilloscope image, a "Value \$380" tag, and the text "SDS2000HD-PA (Free)". Below the box is the text "Offer expires: 10/31/2023". At the bottom of the banner is the registration link: "Register at www.siglentna.com/Promotion-Registration/".

SIGLENT SDS2000X HD Power Analysis Promotion

Power converter design has become an important part of electronic product development. Engineers can measure many of the parameters of SMPS manually, but this is extremely time consuming and inconvenient. SIGLENT's SDS2000X HD oscilloscopes provide 12 bits for improved characterization of challenging power designs. Automate and simplify power supply testing with the SDS2000X HD and the free Power Analysis Option Promotion.

Purchase any SDS2000X HD model from 5/1/2023 through 10/31/2023 and get the Power Analysis Option for free. To learn more about the feature-rich SDS2000X HD, click here:
