

SIGLENT exhibits at Embedded World 2020

February 28, 2020

Nuremberg, Germany, February 25-27, 2020 — SIGLENT Technologies, a global leader in the manufacturing of electronic test and measurement equipment, showcased their new 7.5GHz SVA/SSA Spectrum and Vector Network Analyzers, the newly introduced SDS2000X Plus series oscilloscopes, and new development products at this year's Embedded World Exhibition.

During the 3-day event, SIGLENT Technologies had great booth traffic as our team demonstrated SIGLENT's wide range of test solutions for embedded applications. This year, there was also a free EMC focused learning session with demonstrations that attracted a lot of interest from electrical engineers in attendance.

We wish to thank everyone who stopped to speak with us at our booth. And we are looking forward to seeing you there next year!
